SUMMARY

Motivated and curious B.Tech Artificial Intelligence & Machine Learning student with an interest in AI, software development, and problem solving. Passionate about building practical projects, exploring emerging technologies, and continuously improving technical skills through hands-on development. Seeking opportunities to apply academic knowledge and contribute to innovative technology projects.

EDUCATION

Sandip University

Bachelor of Technology (B.Tech) — Artificial Intelligence & Machine Learning

Currently Pursuing

PROJECTS

AI Path Finder Using BFS | Knowledge Representation & Reasoning — Micro Project

- Developed an AI-based path-finding project using the Breadth-First Search (BFS) algorithm.
- Applied graph-search concepts to identify paths between nodes.
- Built a web-based interface using HTML, JavaScript, and CSS.
- Demonstrates understanding of search algorithms, problem solving, and basic AI concepts.

Personal Portfolio / Web Project | GitHub Project — `protfoi1`

- Developed a web project with separate frontend and backend components.
- Organized the application into structured frontend, backend, and documentation sections.
- Demonstrates practical experience with modern web-development project structure.

TECHNICAL SKILLS

Artificial Intelligence & Machine Learning

Data Structures & Algorithms

Problem Solving

Web Development

Git & GitHub

JavaScript

TypeScript

HTML & CSS

Frontend Development

Backend Development

LANGUAGES

Telugu — Fluent English — Good Hindi — Good

CORE STRENGTHS

Problem Solving Quick Learning Logical Thinking Team Collaboration Creativity Willingness to Learn New Technologies Project-Based Learning

CAREER INTERESTS

Artificial Intelligence • Machine Learning • Software Development • Web Development • Data Structures & Algorithms
